

Clarion

Clarion, powered by Reckiapp

Clean data and GDPR retention on autopilot.

Clarion keeps the Bullhorn database clean and compliant. It finds likely duplicate candidates and contacts, merges them field by field, and runs the agency's retention policy with consent requests, legal holds and anonymisation.

The screenshot shows the Clarion dashboard within the Reckiapp interface. The dashboard includes a search bar, navigation tabs (Home, Candidates, Contacts, Accounts, Jobs, Placements, Clarion, More), and a main section for Clarion. The main section has buttons for 'Duplicates', 'Retention', and 'Run scan now'. Below these are four summary cards: '78 Data health score, out of 100', '4 Duplicate pairs to review', '5 Past retention, no action yet', and '0 Records merged today'. The 'Likely duplicates' section lists two pairs: 'Daniel Reyes and Dan Reyes' (96% confidence) and 'Sarah-Jane Holt and Sarah Holt' (89% confidence). The 'Compare and merge' section shows a side-by-side comparison of fields for a pair, with a 'Swap master record' button. At the bottom, there are buttons for 'Not a duplicate' and 'Merge records'.

What it does

Two views

Duplicates and Retention.

Data health score

A score out of 100 that drops for each open duplicate pair and each overdue retention record, and rises as they are cleared.

Counters

Duplicate pairs to review, records past retention with no action, and records merged today.

Likely duplicates list

Each pair shows record type (Candidate or Contact), why it matched (for example same mobile and email) and a confidence %.

Compare and merge

A side-by-side table of fields, with differing fields highlighted.

Merge records

Merges the pair into the master.
