InTime Connector

InTime Connector, powered by Reckiapp

Salesforce and InTime, in sync both ways.

A two-way connector between Bullhorn on Salesforce and RSM InTime. Placements, workers, clients and timesheets go to InTime; timesheet status, invoices and payroll come back onto your records - configured from screens, not code.

What it does

Every way of working

Permanent fees invoiced in InTime, contract placements with InTime timesheets, or timesheets sent from Salesforce.

Two-way, record by record

Salesforce to InTime, InTime to Salesforce, both ways or off - for every record type.

Mappings you can see

Change fields, direction or values on screen, and test on a real record first.

Held back, never lost

Anything InTime would reject is held with the reason and the fix.

InTime data on your records

Timesheets, invoices and status on the placement; payslips live from payroll.

Timesheet runs

A week of approved timesheets in one checked run, with totals that match Salesforce.

Pricing - one flat monthly fee, no per-user charges
