

SkillEasi

SkillEasi, powered by Reckiapp

Code a record in seconds, not a thousand-value picklist.

SkillEasi replaces slow, cluttered picklists with fast, searchable tagging - so recruiters code contacts, candidates, clients and jobs with the skills, industries, locations and levels that drive matching.

What it does

Search as you type

Predictive search across every category, with matches highlighted and keyboard selection for rapid multi-pick.

Instant availability

New values appear in every component that uses that category the moment they are added.

Any object, anywhere

Contacts, candidates, accounts, jobs and custom objects - on record pages, app pages and guided Flows, each with its own title, icon, category and theme.

Unlimited values

Options live in a data object, not the picklist - add thousands of values in minutes with no deployment and no picklist limits.

Clean data by design

Writes back to your existing picklist and multi-select fields, and only ever saves active values - so reporting and matching stay reliable.

Auto-save or review first

Selections save on click, or batch them up and save when you are ready.

Pricing - one flat monthly fee, no per-user charges

Team

Up to 25 users

£250 /mo

Business

Up to 60 users

£550 /mo

Enterprise

Unlimited users

£900 /mo
from

One-off implementation from **£1,500** - live in **2-4 weeks**. Annual billing shown, excluding VAT. Salesforce and Bullhorn licences not included.
