

Vision

Vision, powered by Reckiapp

Everything you never knew about the people in your CRM.

Vision replaces the Salesforce contact list view with a people workspace. Click a name and you get the person: who they are, what you have done with them, where they rank against people like them, and what to do next.

What it does

Self-maintaining lists

Criteria rebuild on every load, so anyone who starts matching appears without being added.

List report

Coverage from never touched to placed, a needs-attention queue, core skills and the best records.

Candidate intelligence

Rate trajectory, employment timeline, verified education and skills scored in years of depth.

Will they land

A fit score per hiring manager, built from what that manager has actually hired, paid and said.

Client commercial read

Fees by year, price sensitivity, responsiveness and a worth-pursuing score with the reasoning.

Fourteen wired actions

Every action validates, writes a timestamped activity and updates the record immediately.
